Career Objective

To secure a challenging position in a reputable organization to expand my learnings, knowledge and skills that plays an important role in the growth and development of the company.

Projects Undertaken:

1. **Insurance Management System**
   This is a web-based application that enables insurance companies to manage policies, customers, claims, and other aspects of their operations. The system is designed to automate various tasks and streamline workflows, making it easier for insurance companies to manage their operations efficiently.
   Language Used: HTML, CSS, Bootstrap, Django, JavaScript, MongoDB.

2. **Smart Examination System**
   A web-based application that enables educational institutions to conduct online examinations. The system is designed to simplify the examination process and provide a secure and efficient way for students to take exams remotely.
   Language Used: HTML, CSS, Bootstrap, jQuery, Django, SQLite3, JavaScript.

3. **Flight Booking System**
   It is a desktop application that enables users to search for and book flights. The system is designed to simplify the flight booking process and provide a user-friendly interface for usres to select their travel dates, destinations, and preference.
   Language Used: Python(Tk), MySQL.
